

28 March 1958

SUBJECT: Modification of K Rack

TO: Contracting Officer

Reference letter no. 25568 dated 19 March 1958 which forwarded the contractor's proposal for modification of the K rack. The requirement for a speed conversion kit and timer for K rack has been discussed with FOG users and is a desirable change. If it is decided to procure this modification kit for Project equipment, request that authorization also include sufficient kits for FOG racks. Please advise this office of the final decision on this matter.
